Maximizing the power of ORCID with PlumX interoperability

Tell the Story of Research

Plum Analytics develops and delivers products and services that are redefining how scholarly impact is measured. PlumX™ is a research dashboard that analyzes newly available impact metrics to provide information about how research is being utilized and talked about around the world.

How does this help you?
1. Target Funding Opportunities
2. Determine Limited Submission Applicants
3. Find Collaboration Partners

How does that work?
By gathering lots of metrics from multiple sources about many different research artifacts (not just articles).

Get Started
Start with your research output – wherever it is. We map it to PlumX and maintain your hierarchy and structure.
- ORCID
- ORCID
- Institutional Repository
- CRD
- CRD
- Researcher Productivity Tools

Categorizing Metrics
To make sense of a lot of metric data PlumX creates meaningful categories:

Artifact Identity Resolution
PlumX tracks multiple versions of the same article.
Examples:
- PDF
- Publisher
- Institutional Repository
- PubMed Central
- Open Access Archive

PlumX starts with a Seed Identifier and automatically finds other identifiers for the same article.
Example:
URL
DOI
PubMed ID
IR ID
SSRN

You can start with any ID and PlumX has built-in intelligence to find the others associated with it. This can even be a URL.

Analyze
Use the metrics in PlumX to discover what is happening with research output. The analytics that PlumX provides helps you analyze your research at many levels.

Artifact Identity Resolution
PlumX tracks multiple versions of the same article.
Examples:
- PDF
- Publisher
- Institutional Repository
- PubMed Central
- Open Access Archive

PlumX starts with a Seed Identifier and automatically finds other identifiers for the same article.
Example:
URL
DOI
PubMed ID
IR ID
SSRN

You can start with any ID and PlumX has built-in intelligence to find the others associated with it. This can even be a URL.

Integrate PlumX Where You Need It
PlumX provides embeddable widgets to use in:
- Article pages
- Results lists
- Author pages

Example:
The Autism Speaks grant search system integrates with PlumX.

Track 20+ Types of Research Output

- articles
- blog posts
- book chapters
- cases
- clinical trials
- conference papers
- datasets
- figures
- grants
- interviews
- letters
- media
- patents
- posters
- presentations
- theses / dissertations
- videos
- web pages

Researcher Profiles
PlumX uses existing systems to create PlumX profiles to see the researchers, their output and the associated metrics.

Antony Williams
ORCID 0000-0002-7843-6630

An artifact-level widget shows the research articles created with the grant.

Artifact Identity Resolution
PlumX tracks multiple versions of the same article.
Examples:
- PDF
- Publisher
- Institutional Repository
- PubMed Central
- Open Access Archive

PlumX starts with a Seed Identifier and automatically finds other identifiers for the same article.
Example:
URL
DOI
PubMed ID
IR ID
SSRN

You can start with any ID and PlumX has built-in intelligence to find the others associated with it. This can even be a URL.
